PROFESSIONAL SUMMARY

Cybersecurity professional with a strong focus on Governance Risk and Compliance (GRC), enterprise cyber risk management, and security Risk reporting. I apply Risk management frameworks and methodologies to identify, assess, prioritize, and manage cybersecurity risks, evaluate security controls, develop risk treatment strategies, and translate technical findings into meaningful business insights that support informed, risk based decision making

TECHNICAL SKILLS

- Cybersecurity Governance, Risk & Compliance: Cyber Risk Assessment, Risk Identification and Analysis, Risk Treatment, Risk Registers, Security Control Evaluation, NIST Cybersecurity Framework
- Risk Metrics & Reporting: Cyber Risk Quantification, FAIR Methodology, Key Risk Indicators (KRIs), Key Performance Indicators (KPIs), Risk Dashboards, Risk Reporting
- Security Operations & Vulnerability Scanning: Vulnerability Assessment, Security Misconfiguration Analysis, Incident Documentation, Security Monitoring, Remediation Recommendations
- Security Tools & Frameworks: ISO/IEC 27001, NIST Framwork, Nessus Essentials, Wazuh SIEM

PROFESSIONAL EXPERIENCE

Digital Customer Service Representative | E-Commerce Security | Canadian Tire Financial Services | May 2020 - Present

- Security Controls & Compliance: Apply established security procedures and access controls to protect sensitive customer information, prevent unauthorized account access, and support compliance with organizational security requirements.
- Risk Identification & Assessment: Review customer account activities and e-commerce transactions to identify suspicious patterns, potential fraud indicators, and security risks requiring further investigation.
- Security Risk Escalation: Identify, document, and escalate suspected fraud, unauthorized access, and account security concerns to designated investigation teams in accordance with established procedures.
- Audit Documentation & Reporting: Maintain accurate records of identity verification, account activities, security related findings, and escalations to support operational accountability, traceability, and audit readiness.
- Identity & Access Management (IAM): Perform customer identity verification, account authentication, and account provisioning activities, including account lockouts, access restoration, and account security reviews in accordance with established security policies.

RELEVANT PROJECTS (Github Evidence Portfolio)

ISO/IEC 27001:2022 Annex A - Control Assessment & Remediation Planning
- Conducted an ISO/IEC 27001:2022 Annex A security control gap analysis for a simulated financial services organization, assessed control implementation, evaluated supporting evidence, documented control deficiencies, and recommended corrective action to strengthen the organization’s Information Security Management System (ISMS)

Cyber Risk Assessment and Metric Reporting
- Conducted a Risk Assessment for a Fictional Financial Company, developed a Risk Register to highlight Identified Key critical Assets and the Cyber Risk associated with them, Likelihood and Business impact. Quantified financial exposure using FAIR concept. Recommended Risk Treatments and security controls. measured residual risk using KPIs, KRIs, trends, and control effectiveness and created a report to communicate findings to the executive committee.

Vulnerability Assessment & Risk Management | Nessus Essentials
- Conducted vulnerability assessments across multiple Windows endpoints using Nessus Essentials to identify security weaknesses, misconfigurations, and control gaps. Analyzed findings to assess risk severity, potential security impact, and control effectiveness. Developed risk based remediation recommendations focused on security policy enforcement, configuration hardening to reduce organizational risk exposure.

EDUCATION & CERTIFICATIONS
Computer Network and Cybersecurity Engineering
Computek College
Bachelor of Commerce (Accounting)
Mount Kenya University

CERTIFICATIONS
CompTIA Security+
ISC2 Certified in Cybersecurity
ISO 27001 Lead Auditor (In Progress)
